

New Generation of Vapor barrier tape

Our most flexible and easy to use tape.

Customer benefits:

- All-In-One solution for indoor use
- For overlap bonding of vapor barriers as well as critical bonding of penetration areas
- Strong tack on a variety of substrates
- Fast and save processing
- Solvent-free, no emissions
- EC1 certification
- Scrim-reinforced film tape, extensible in cross direction with a high adhesive strength even at low temperature
- High ageing stability, up to 3 months under outdoor exposure
- Low water susceptibility
- Easy to tear through jagged edges
- No liner - Reduction of waste and time in application
- According to DIN 4108/7; SIA 180; ÖNORM B8110/2; ENEC, Ecode EC1

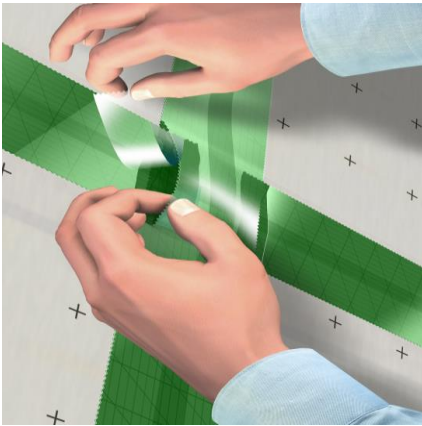

Products:

- DuploCOLL® 21117

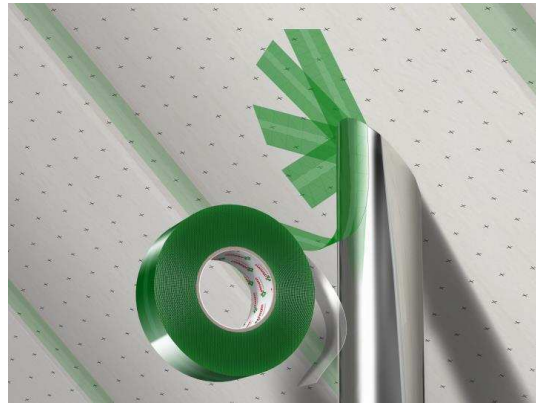

New Generation of Vapor barrier tape

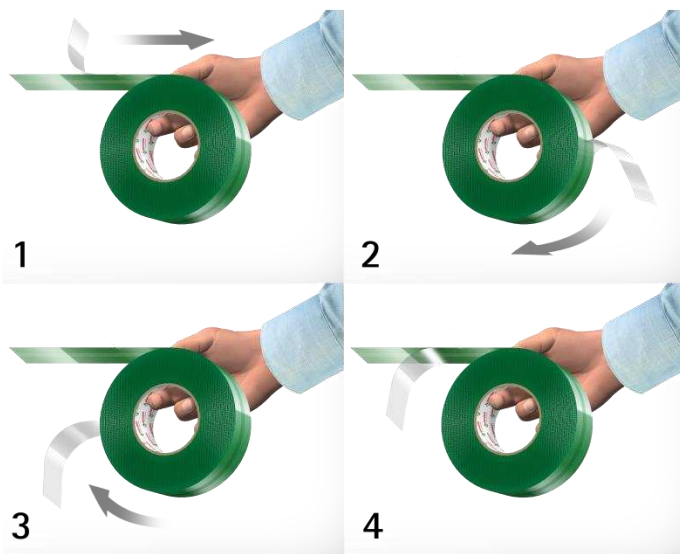

In one step from lab joints to penetration joints.

- Airtightness within the T-Shape

- Circular penetrations, such as cables or pipes, can be easily sealed with the single sided tape to make them airtight

Two-in-One solution:

- Single sided vapor barrier tape with a high adhesive coating weight and integrated fingerlift.
- Can be used also as double sided adhesive tape by simply moving back the upturned film.
