

# Bonding of decorative elements

Windows & Doors.

## Customer benefits:

- High initial and final adhesion
- Fast and easy handling
- Resistant to temperature, UV radiation, ageing, weathering, plasticizers and solvents
- Bonding of different materials with different expansion coefficients
- No curing times necessary

## Products:

- DuploCOLL® 9042
- DuploCOLL® 56002
- DuploCOLL® 5016

# Bonding of decorative elements

Windows & Doors.

## Products:

### DuploCOLL® 9042

- High initial adhesion
- High final adhesion
- Resistant to temperature, UV radiation, weathering, plasticizers and solvents
- Vibration dampening
- Carrier anthracite, liner white paper

### DuploCOLL® 56002

- Good initial adhesion
- High final adhesion
- Resistant to temperature, UV radiation, weathering, plasticizers and solvents
- Vibration dampening
- Carrier black, liner yellow film

### DuploCOLL® 5016

- Excellent initial adhesion
- High shear strength
- Resistant to temperature, weathering, plasticizers and solvents
- Carrier black, liner yellow film
